About Site -

Tools

We used HTML, CSS, JavaScript, FullPage.js, SASS, jQuery, popper.js and Bootstrap to develop our site

How The Site Was Developed -

We initially made the site framework using HTML and CSS. These were scripting and markup languages that we were previously familiar with. This familiarity allowed us to make a good basic site. We then developed on this with more advanced techniques and programming languages. JavaScript allowed us to make a more interactive site for the user. We then added on the FullPage.js in order to have a more useful scrolling method for our pages. The SASS brought in variable complexity that took the site to a whole new level. The jQuery was used to give a library for use with the JavaScript. Finally, we used Bootstrap to pull the whole website together. The use of cards and symmetry really made the site a design masterpiece.
